

WALTHER PILOT NORTH AMERICA

The TWIN Type TR-2 Mold Release Spraying System includes:

- PILOT Twin Spray Gun (HVLP version available)
- Type LCB 2 pressure tank (2 liter capacity) with twin fitting & safety valve
- Hose package PU-Twin 15 foot twin hose consisting of air hose & material hose
- Choice of nozzle sizes:
0.2 / 0.3 / 0.5 / 0.8 / 1.0 / 1.2 / 1.5

Part Number: V 40 700 00 000

The PILOT Twin was developed for spraying low-viscosity materials such as separating agents. The TWIN is available in an HVLP version with minimal overspray.

Application examples:

- In the production of PU foam in the auto industry
- For spraying drawing oil in foaming technology
- For spraying water in chemical processes

The PILOT Twin offers a choice of three different spraying angles (30°, 60°, and round jet). There is no need to change the nozzle insert or air cap to switch between spraying angles. You need only change the air distributor rings, which are included with the spray gun. The ring can be changed in seconds without tools.

The PILOT Twin system is shipped ready-to-use and includes a 15 foot twin hose and a 2 liter aluminum pressure tank.

The system components can also be supplied individually.
